S4_1 Agile Documentation — Screenshot Submission

Student Name:
Date:
Assignment: S4_1 Agile Documentation
Repository: [paste your GitHub repo URL here]

How to Use This Template

1. Create a folder named `images/s4` in your repository. This is where you'll save both this template and every screenshot for this assignment.
2. Save this file into `images/s4/` and rename: `lastname-S4_1-agile-docs.md`
3. Fill in name, date, and repo URL above
4. Take each screenshot and save it directly into `images/s4/`, using the exact filename shown below each placeholder (e.g., `sprint_plan.md.png`)
5. Embed each screenshot in the placeholder below it — since the template and screenshots live in the same folder, the image links already point to the right place
6. Export to PDF: right-click in VS Code → **Markdown PDF: Export (PDF)** — the PDF will save into `images/s4/` alongside the template and screenshots
7. Rename: `lastname-S4_1-agile-docs.pdf`
8. Submit to Blackboard → **S4_1 Agile Documentation**

> [!TIP] Keeping the template and screenshots in the same `images/s4/` folder means the image links in this file work without any changes. If you save a screenshot somewhere else, its embed will show as broken when you preview or export the file.

Screenshot 1 — Sprint Plan PR

What to capture: `docs/s4-sprint-plan` PR → Files Changed → `sprint_plan.md` replaced with Sprint 4 content

Save as: `images/s4/sprint_plan.md.png`

[Embed Screenshot 1 here]

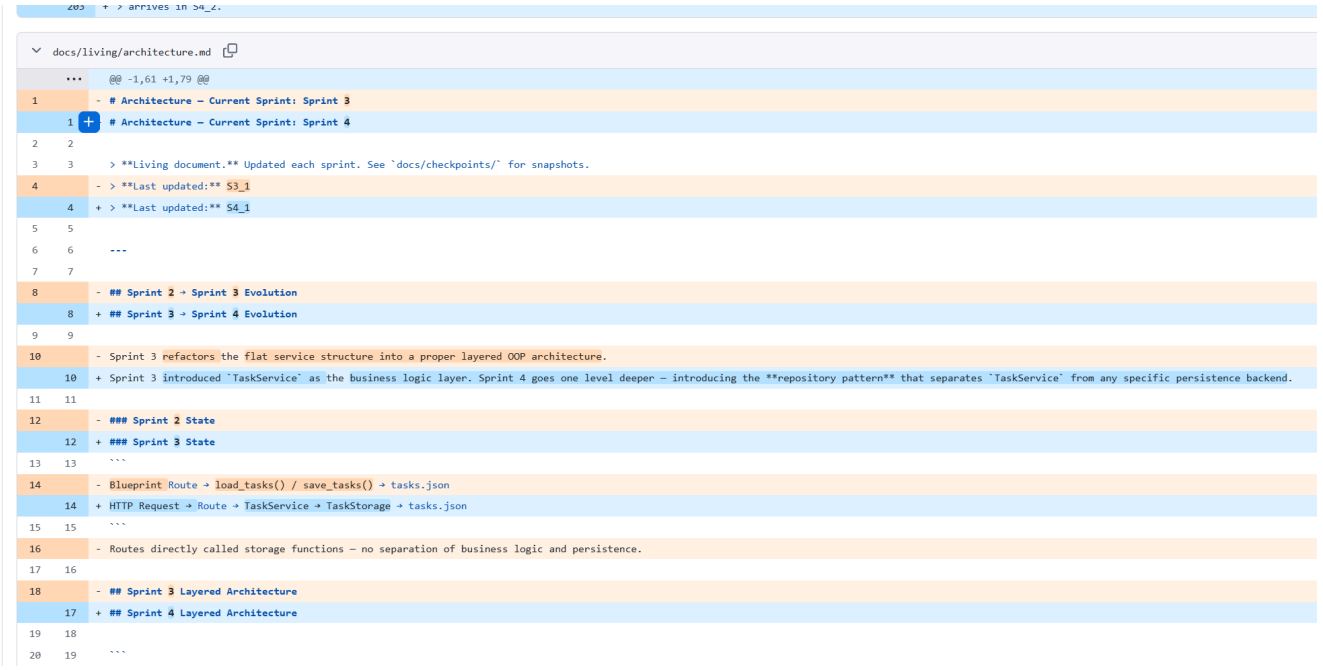

Screenshot 1

Screenshot 2 — Architecture Diff

What to capture: `docs/s4-agile-docs` PR → Files Changed → `architecture.md`
Visible: Repository pattern layered architecture; Sprint 3→4 changes table (incl. CI pipeline row); CLI retirement note; CI Pipeline section

Save as: `images/s4/architecture.md.png`

[Embed Screenshot 2 here]

docs/living/architecture.md

```
@@ -1,61 +1,79 @@
- # Architecture — Current Sprint: Sprint 3
+ # Architecture — Current Sprint: Sprint 4

  > **Living document.** Updated each sprint. See `docs/checkpoints/` for snapshots.
- > **Last updated:** S3_1
+ > **Last updated:** S4_1

  ---

- ## Sprint 2 → Sprint 3 Evolution
+ ## Sprint 3 → Sprint 4 Evolution

- Sprint 3 refactors the flat service structure into a proper layered OOP architecture.
+ Sprint 3 introduced `TaskService` as the business logic layer. Sprint 4 goes one level deeper — introducing the **repository pattern** that separates `TaskService` from any specific persistence backend.

- ### Sprint 2 State
+ ### Sprint 3 State
  ```
- Blueprint Route → load_tasks() / save_tasks() → tasks.json
+ HTTP Request → Route → TaskService → TaskStorage → tasks.json
  ```
- Routes directly called storage functions — no separation of business logic and persistence.

- ## Sprint 3 Layered Architecture
+ ## Sprint 4 Layered Architecture

  ```
```

Screenshot 3 — Test Plan Diff

What to capture: Files Changed → `test_plan.md`
Visible: OBJ-22 through OBJ-26a added; pytest-mock and GitHub Actions in tools table; CI Test Execution Strategy; RISK-CI-01 status Mitigated

Save as: `images/s4/test_plan.md.png`

[Embed Screenshot 3 here]

Screenshot 3

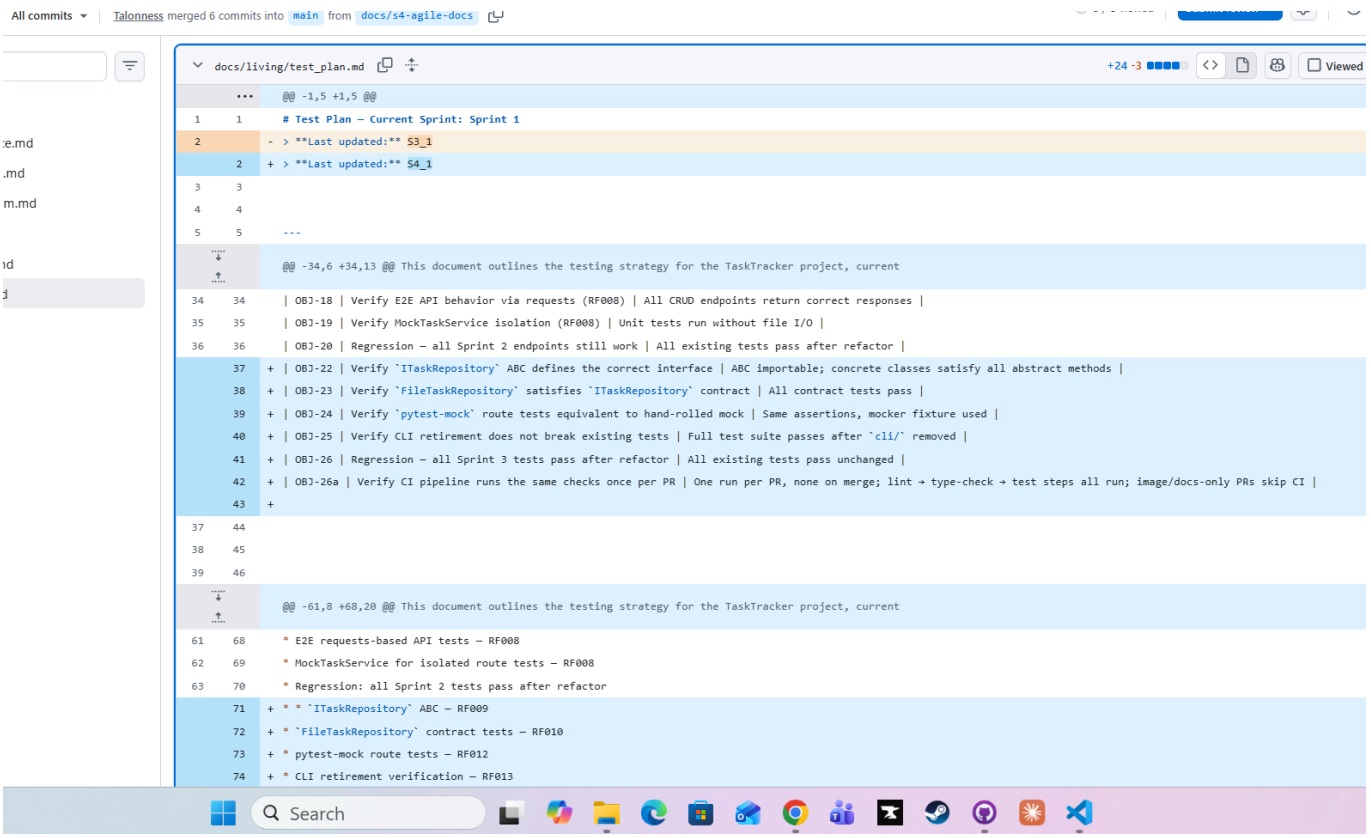

Screenshot 3a — Test Plan Diff (continued, only if needed)

What to capture: The rest of the `test_plan.md` diff that didn't fit in Screenshot 3 — scroll down and capture from where Screenshot 3 ends

Save as: `images/s4/test_plan.md_3a.png`

> [!NOTE] **Only use this if the diff didn't fit in one screenshot.** If Screenshot 3 shows everything, delete this whole Screenshot 3a section before exporting to PDF.

[Embed Screenshot 3a here]
```

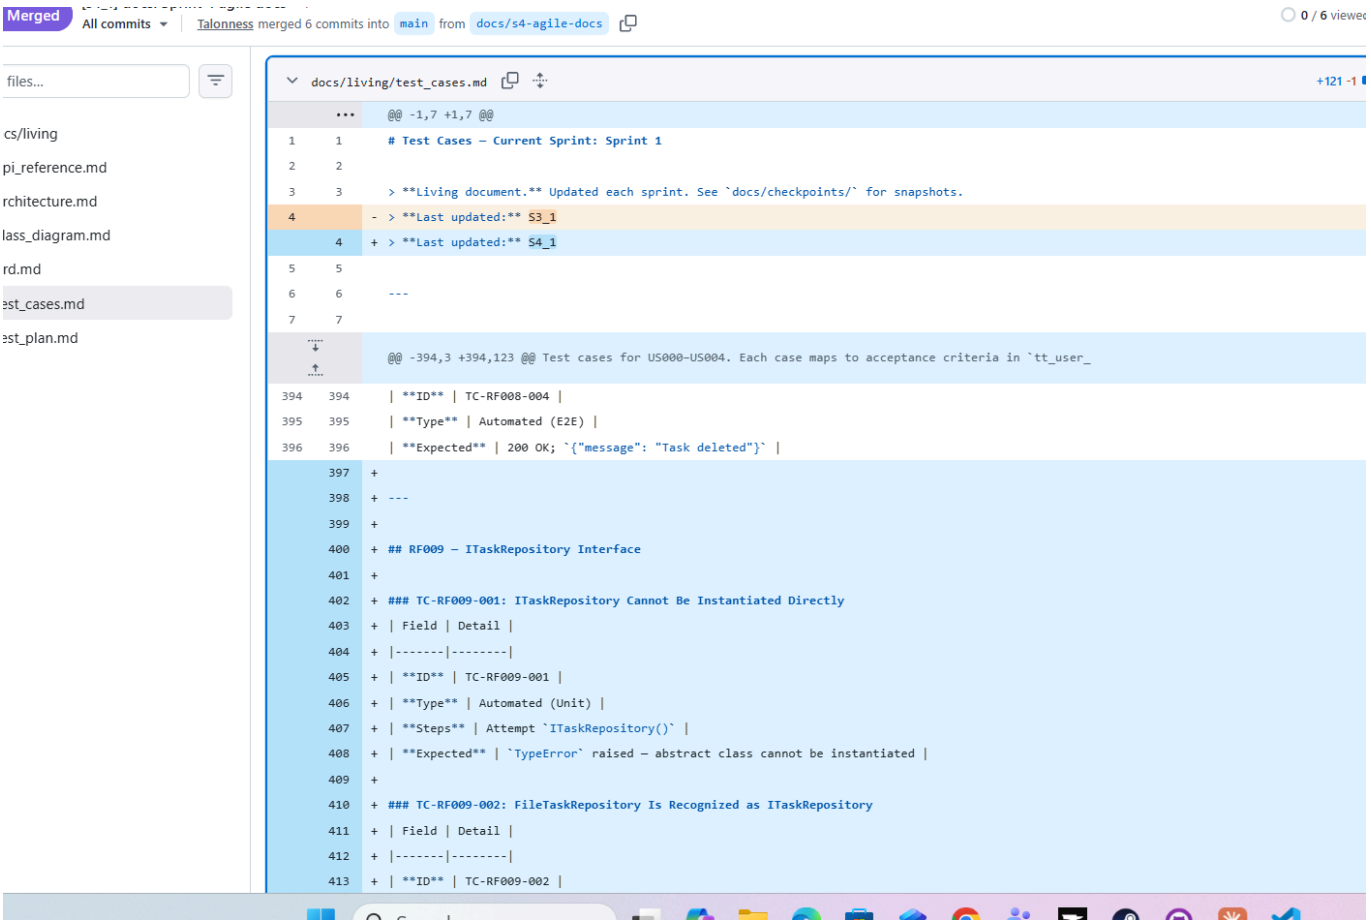

Screenshot 4 — Test Cases Diff

What to capture: Files Changed → `test_cases.md`
Visible: RF009, RF010, RF012, RF013 and SQA CI (TC-SQA-002–004) test case sections added

Save as: `images/s4/test_cases.md.png`

[Embed Screenshot 4 here]

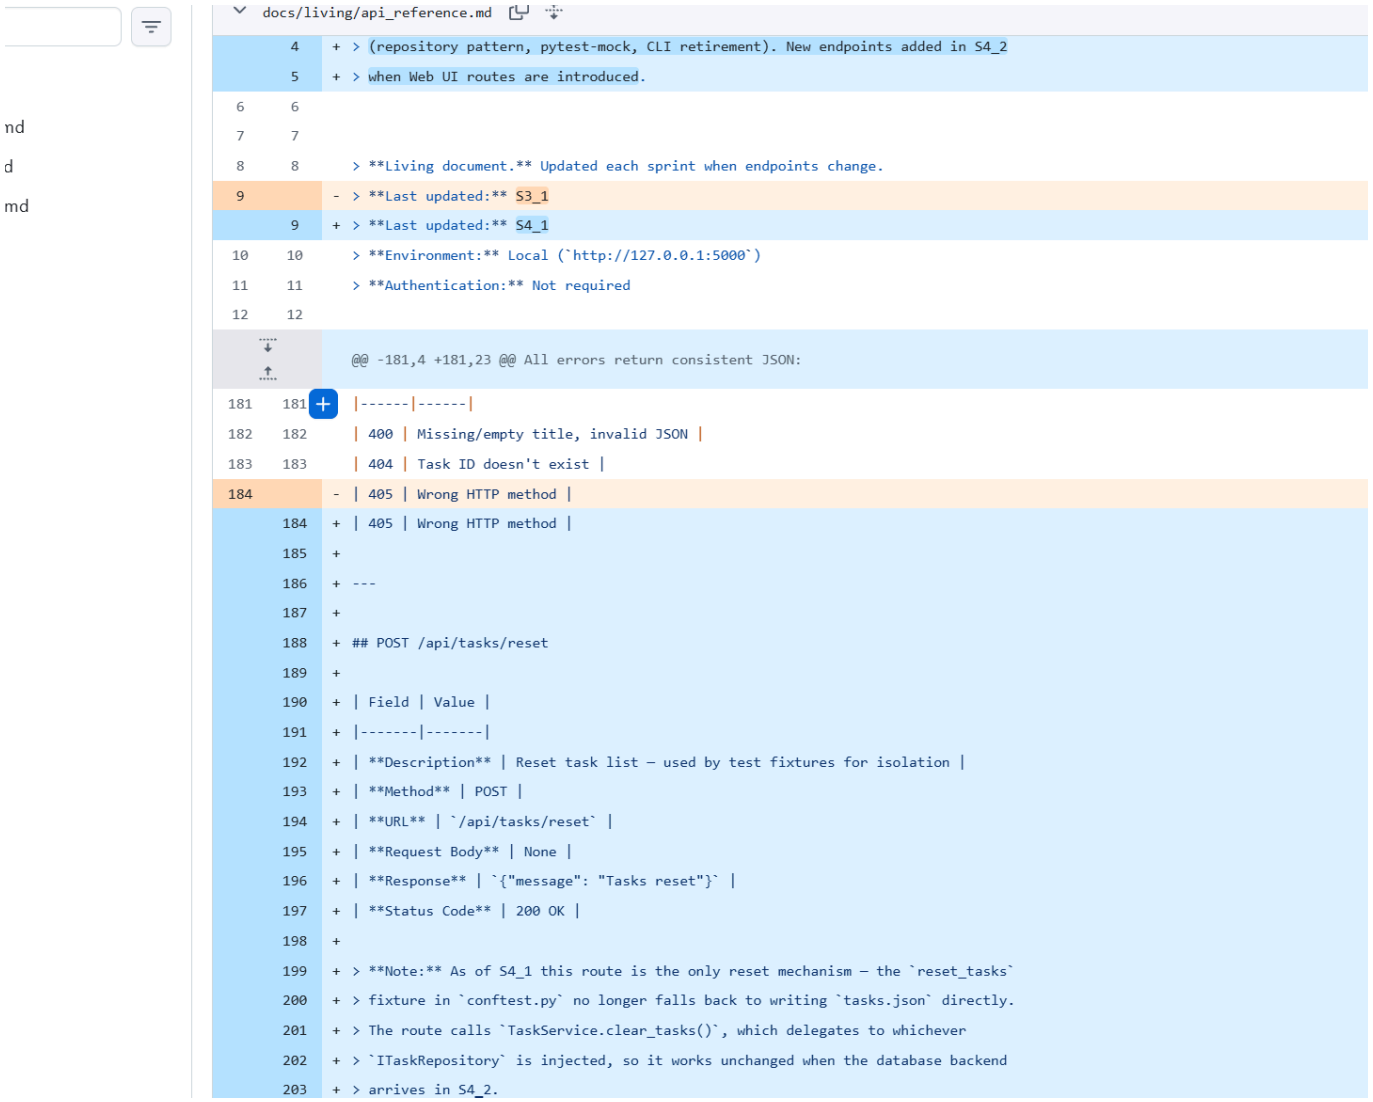

Screenshot 5 — API Reference Diff

What to capture: Files Changed → `api_reference.md`
Visible: S4_1 note at top (no new endpoints in S4_1); `POST /api/tasks/reset` section with its note

Save as: `images/s4/api_reference.md.png`

[Embed Screenshot 5 here]

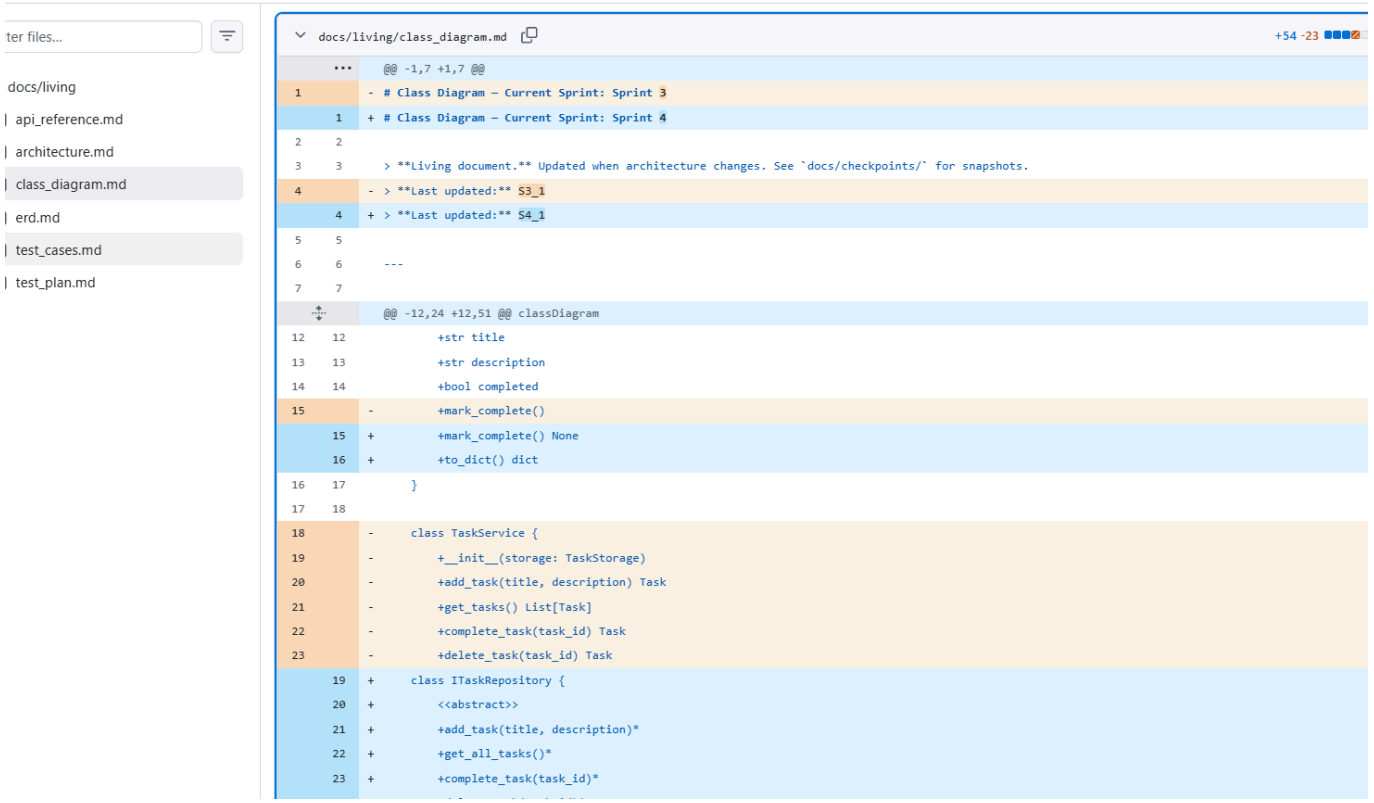

Screenshot 6 — Class Diagram Diff

What to capture: Files Changed → `class_diagram.md`
Visible: `ITaskRepository`, `FileTaskRepository`, `DatabaseTaskRepository` added; `MockTaskService` removal noted

Save as: `images/s4/class_diagram.md.png`

[Embed Screenshot 6 here]

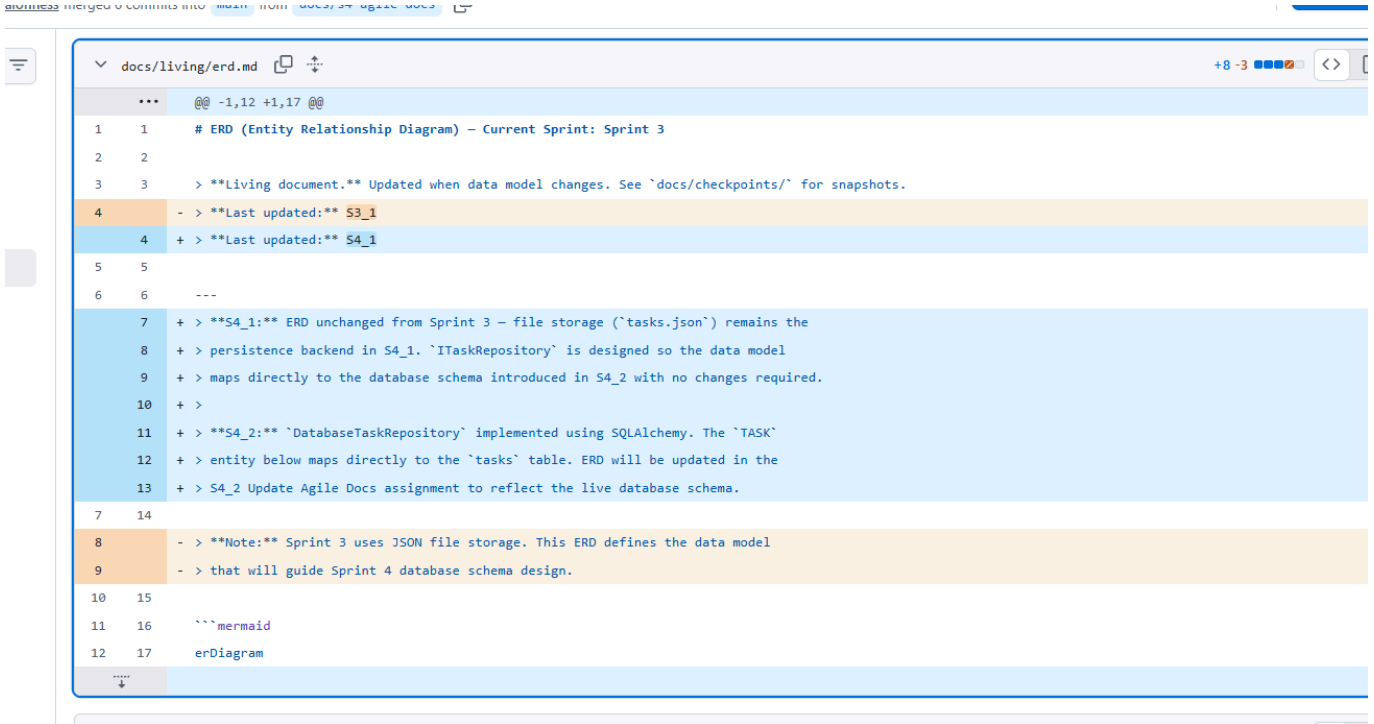

Screenshot 7 — ERD Diff

What to capture: Files Changed → `erd.md`
Visible: S4_1 and S4_2 notes updated; database preview added

Save as: `images/s4/erd.md.png`

[Embed Screenshot 7 here]

Submission Checklist

- ☐ `images/s4/` folder created, with this template and all screenshots saved inside it
- ☐ Screenshots 1–7 all embedded above (plus 3a only if the Test Plan diff needed two screenshots)
- ☐ PDF exported and renamed: `lastname-S4_1-agile-docs.pdf`
